

Desytech Studio

A Desytech Groupe service

Desytech Studio in pictures

Welcome to Desytech Studio

Your turnkey streaming studio in Albi.

At Groupe DesyTech, we are experts in creating audiovisual experiences and we are ready to host your digital meeting or live event !

About Desytech Studio

Our studio is located in the **Exhibition Center of Albi**, 55 minutes from Toulouse, 1 hour from Rodez and 45 minutes from Castres.

It is perfect for live broadcasts with or without an audience*, training videos or product launches.

It is fully equipped, with a 9x3 meter high resolution digital screen that can easily be adapted to your needs, as well as complete technical equipment for **streaming**; cameras, video switcher, streaming server and audio and lighting equipment.

**Streaming studio in
Albi**

-

**live broadcast,
training videos,
product launch,
digital meeting**

* in accordance with Government directives

We can start your show in a few minutes!

Just contact us with the details you would like to present and your logo/graphic charter that you would like to use as background. Our on-site technicians will make sure everything else works.

The live broadcast can reach its audience either through a link provided by us or as a stream that you integrate on your own website or social media. Everything is also recorded.

Digital Events

During your live broadcast, your digital audience can chat live or participate in **surveys** directly in our streaming service.

We can deliver your stream on any platform, for example: Youtube, Skype, Vimeo, Zoom, Teams or GoogleMeet.

We are **not limited** to any specific service or provider.

Annual meetings with voting

We use a **secure** formal digital meeting system, which includes all necessary functions such as agenda, participation, **voting** and a secure login with username/password. Board of directors members conduct the meeting from our studio while participants log into our meeting system from their **homes** on their own digital unit.

Product launches

We have sufficient free space in our big studio, making it the ideal place for an online product launch. It is possible to create several spaces with different **scenographies** and products.

The studio also includes a **stage** that can be used for live shows and presentations.

Our studio is also equipped for simultaneous translation.

—

Each participant can therefore follow the meeting or event in the available language of his/her choice.

The safety at Desytech Studio

In the current delicate context, it was unthinkable for us to open this studio without taking important **hygiene precautions**. This is why a series of measures have been put in place to ensure maximum safety:

- ✦ Temperature control and hand washing at the entrance to the studio.
- ✦ Disinfection of the microphones and equipment after each use.
- ✦ Disinfection of the studio by UV-C technology every night.
- ✦ Wearing a face mask is mandatory for all persons out of camera range (provided by us).
- ✦ Implementation of social distancing in the control rooms and as much as possible on set.

The UV-C technology, which has been used in the hospital environment for several years, allows a complete disinfection of the studio every night.
